

dralon[®] X 100

Standard type for unblended processing or in blends with other fibers.

Available titer dtex	cut length mm	Lustre
3.3	28, 40, 60, 64, 85 - 105, 85 - 125 VC	bright / semidull
4.1	60	bright / semidull
5.0	32, 60, 75, 85 - 105 VC	bright
5.0	60, 75, 85 - 105 VC	semidull
6.7	60, 75, 85 - 105 VC	bright
11.0	110 - 130 VC	bright / semidull
17.0	130 - 150 VC	bright / semidull

Supply form:

bales of 300 kg packaged in polyethylene foil with polyester hoops.

Dimensions:

107 x 100 x 74 cm (lxbxh)

dralon[®] X 250

Fully relaxed fiber with very fine titer for rotor-spinning and cotton-spinning systems. Well suited to blends with natural or synthetic fibers.

Available titer dtex	cut length mm	Lustre
1.3	40	bright / semidull
1.7	40	bright / semidull
2.2	50	bright

Supply form:

Bales of 300 kg packaged in polyethylene foil with polyester hoops.

Dimensions: l x w x h

107 x 100 x 74 cm (lxbxh)

dralon[®] X 251

Fully relaxed fiber with very fine titer for rotor-spinning and cotton-spinning systems. Well suited to blends with natural or synthetic fibers.

Available titer dtex cut length mm Lustre

1.1	40	bright
1.3	40, 50	bright
1.7	40	bright

Supply form:

Bales of 300 kg packaged in polyethylene foil with polyester hoops.

Dimensions: l x w x h

107 x 100 x 74 cm (lxbxh)

dralon[®] X 800

Tow type for stretch breaking. Can be employed to produce normal and high bulk yarns. Shrinkage approx. 19 - 22 %. Gives the yarns a full and voluminous handle.

Available titer dtex	tow weight ktex	Lustre
1.7	95	bright / semidull
2.2	95	bright / semidull
2.6	120	semidull
3.3	95, 125	bright / semidull
4.1	95, 125	bright / semidull
5.0	95	bright / semidull
6.7	125	bright

Supply form:

Bales of approx. 630 kg packaged with polypropylene fabric and polyester hoops.

Dimensions: l x w x h

117 x 100 x 105 cm (lxbxh)

dralon[®] X 860 / condralon

condralon is a new tow type for stretch breaking. With its shrinking capacity of up to 28 % it is ideally suited for the production of mink blankets due to its combination of high pile stability with extraordinarily soft hand.

It can of course also be employed for other applications especially if a high shrinkage is required.

Available titer dtex tow weight ktex Lustre

2.6	110	bright
-----	-----	--------

Supply form:

Bales of approx. 630 kg packaged with polypropylene fabric and polyester hoops.

Supply form:

118 x 100 x 100 cm (lxwxh)

dralon[®] L 930

Tow type for yarns with improved pilling properties.

Available titer dtex tow weight ktex Lustre

2.2	110	semidull
3.0	130	semidull

Supply form:

Bales of approx. 750 kg packaged with polypropylene bags and polyester hoops.

Dimensions: l x w x h

118 x 113 x 105 cm

dralon[®] L 940

Tow type for ecru yarns with a very soft handle.

Available titer dtex	tow weight ktex	Lustre
3.3	145	semidull
5.6	135	semidull

Supply form:

Bales of approx. 750 kg packaged with polypropylene bags and polyester hoops.

Dimensions: l x w x h

118 x 113 x 105 cm
